GIVE YOUR HOME
THE ELEGANT
LOOK OF STONE.

« So we decided that if the roof had to be done, we might as well give the house a whole new look.

Also, installing Beonstone allows the addition of compressed insulation board. » – p 6

BEHIND
THE STONE

Learn about the **D.RAIN system**. This patented system automatically aligns, blocks and anchors the panel to the wall and provides safe drainage in the event of water infiltration. – p. 18

THE SMALLEST TOOL BOX REQUIRED

NO MORTAR, NO GLUE, NO MESS.

Light and easy to handle, Beonstone panels are **effortless to install**. Just set them in place and screw. That's all there is to it. No mortar, no glue, no mess. – p. 12-13 or visit the **INSTALLATION** section at www.beonstone.com

BROMONT HOME LOOKS PERFECT!

Any home is more stylish with **stone accents!** – p. 12

TOO MUCH BLAND WHITE EVERYWHERE?

Live in a condo? Add warmth to your living space by opting for the **texture** and **feel** of stone. – p. 14

DO YOUR OWN INSTALLATION

“We enjoy renovating, and working with Beonstone products was a snap. We installed them ourselves!” – p. 19

WE WERE LOOKING FOR AN INNOVATIVE SOLUTION AND FOUND A WHOLE LOT MORE!

“When we visited our **distributor**, he gave us a ton of practical advice. We discovered the world of Beonstone, a world of distinctive products that enabled us to create and transform our living space in just a few hours. Our **renovation was a complete success** thanks to the exceptionally elegant appearance and class of natural-looking stone provided by Beonstone Panelized Stone Siding.”

WE WANTED
TO LIVE HERE.
WE FIXED IT.

BEFORE

- UNLIKE MASONRY, THE PANELS REQUIRE NO FOUNDATION OR SPECIAL SUPPORT.
- ALLOWS THE ADDITION OF COMPRESSED INSULATION BOARD.
- THEY ARE SELF-SUPPORTING.

« AND SO WE DECIDED THAT IF THE ROOF HAD TO BE DONE, WE MIGHT AS WELL GIVE THE HOUSE A WHOLE NEW LOOK.. »

In their early thirties, Antoine and Juliette are the happy parents of two young children... and now the happy owners of a small home that needed some fixing up. *"When we bought the house, we knew that the roof would soon have to be done,"* notes Antoine. *"A few other things bothered us as well. It wasn't the home of our dreams, but the price fit our budget."* Their first child arrived and then a second, much sooner than expected. Should they move?

"We considered that option," explains Juliette, *"but we like the location here—it's close to the park, the daycare, the primary school and the children's grandparents. It would be difficult to find all that again. And so we decided that if the roof had to be done, we might as well give the house a whole new look."*

Antoine enjoys renovating. Juliette lent a hand whenever she could, and Antoine could also count on his father, who is something of a handyman. *"In any case, it was a real pleasure working with the Beonstone panels. They are light, easy to cut, and handle really well."*

The finish of the new overhanging section perfectly blends stone and wood, and Julie is delighted with the home's fresh contemporary appearance. *"We finished the work just in time for winter. In the spring, all that will remain is a bit of finishing up,"* Antoine boasts, proud of his handiwork.

100%
RENOVATION

FOR SEVERAL MONTHS, THE LANCTÔT-NADEAU FAMILY WERE HESITANT. THEY DIDN'T WANT TO MOVE, FOR THEY LOVED THEIR NEIGHBOURHOOD. RENOVATE? THIS WAS THE OBVIOUS CHOICE, BUT WOULD THEIR BUDGET ALLOW THEM TO GIVE THEIR HOME THE APPEARANCE OF STONE THEY FOUND SO APPEALING?*

“Wow!” Her face beaming, Lise Lanctôt admires the new look of her home. No more pink aggregate finish. *“We liked the look when the house was built 30 years ago, but later came to find it quite distasteful!”* “The siding was also damaged by water infiltration,” adds her husband, Gilles Nadeau.

At their first meeting, the exterior siding installer reassured them that a revolutionary new product had been on the market for a few years: Beonstone panelized stone siding. No mortar, no glue, no mess—these panels are quick to install and truly affordable. With a minimal budget for materials, they were able to give their home a magical facelift. *“The panels are guaranteed for 50 years and have an integrated system that protects against water infiltration!”* exclaims Gilles. *“Not only do we sleep more easily, our house has increased in value. What more could you want?”*

- NO MORTAR, NO GLUE, NO MESS
- INSTALLS QUICKLY
- TRULY AFFORDABLE
- GUARANTEED FOR 50 YEARS
- INTEGRATED SYSTEM PROTECTS AGAINST WATER INFILTRATION

OUR PROFESSIONAL
WILL ANSWER ANY QUESTIONS
THAT MAY HAVE COME TO MIND
SINCE YOU STARTED
TO THINK ABOUT INSTALLING
BEONSTONE PANELIZED STONE
SIDING YOURSELF.

TIPS OF THE TRADE

DOES BEONSTONE GO WELL WITH OTHER MATERIALS?

Absolutely! The panels are available in three natural stone textures with three colour options. You have a wide range of choices to give your home a contemporary, traditional or country look.

WHAT ARE BEONSTONE PANELIZED STONE SIDING MADE OF?

The highly resistant panels are made of light concrete with colouring incorporated right into the mixture. Beonstone panelized stone siding are guaranteed for 50 years.

ARE THE PANELS WATERTIGHT?

The panels include an integrated system to prevent water infiltration. When preparing the wall, you begin by installing water-repellant paper and sealing the joints with construction tape. The ingenious mechanical anchoring system creates a natural airspace when the Beonstone panels are installed. This structure directs any possible water infiltration down to the base of the wall. Air circulation behind the panels prevents humidity from building up and causing mould to form.

WILL I NEED SPECIAL TOOLS?

Exceptionally light, Beonstone panels are easy to handle and cut. All you need to install them is a circular bench saw or mitre saw with a diamond blade.

DO I NEED TO REINFORCE THE WALL AND FOUNDATION BEFORE INSTALLING THE PANELS?

There are no specific structural requirements. You can install the panels inside or outside directly on a partition wall or concrete foundation. If you wish, you can begin by installing compressed panels for better insulation.

Foundation

Standard framed wall with OSB or plywood and rigid insulation

Standard framed wall with OSB or plywood

Standard framed wall with flexible siding

HOW DO I INSTALL THE PANELS AROUND DOORS AND WINDOWS?

If you are renovating without changing the doors and windows, all you have to do is install aluminum moulding to finish around the edges. If you decide to change these openings, it's even easier since you can align the panels directly with the frame of the opening.

Straight finish with silicone seal

Finish with aluminum trim

Finish with window sill

IS IT EXPENSIVE?

Two factors determine the cost: material and installation. As for installation, you can save a great deal by installing the panels yourself. On the other hand, an experienced installer such as myself brings expertise to the project and works quickly and efficiently. After all, experience must worth something!

YOU WILL FIND ON OUR WEBSITE A COMPLETE INSTALLATION GUIDE AND DEMONSTRATION VIDEOS TO GUIDE YOU.

WANT TO GIVE YOUR HOME A TRULY CONTEMPORARY APPEARANCE? TRY MIXING MATERIALS!

A well-designed blend of siding and stone adds modern elegance to the architectural design of a residence. Just be sure to give the stone accents the distinction they deserve.

The same principle applies to interior design. Mixing wood and glass or other materials creates a truly contemporary atmosphere. Giving a section of wall a stone accent, for example, brings out the warmth of the wood.

Jennifer Morand, designer

PERFECT HARMONY IS THE RESULT WHEN ARCHITECTURAL FEATURES ARE THE RIGHT BLEND OF TEXTURES, FORMS AND COLOURS.

THE PRODUCT COLOURS IN THIS BROCHURE ARE AS ACCURATE AS PHOTOGRAPHY AND PRINTING CAN MAKE THEM. WE STRONGLY SUGGEST, HOWEVER, THAT YOU BASE YOUR FINAL CHOICE OF PRODUCT COLOUR ON AN ACTUAL SAMPLE RATHER THAN ON THE IMAGES IN THE BROCHURE. SOME IMAGES HAVE BEEN REPLICATED.

BROMONT HOME LOOKS PERFECT!

- UNLIKE MASONRY, THE PANELS REQUIRE NO FOUNDATION OR SPECIAL SUPPORT.
- THE PANELS ARE LIGHT, EASY TO HANDLE AND SIMPLY SCREW IN PLACE.
- THEY ARE SELF-SUPPORTING.

“...AN INNOVATIVE SOLUTION. BEONSTONE PANELS MADE INSTALLATION OF THE NEW SIDING EASY EVEN IN LESS ACCESSIBLE AREAS.”

The house in Bromont was perfect...well almost. An extra bedroom for a second child. A finished basement. A beautiful yard. A garage. A large shed. And only a few kilometres from Robert's new job. There was just one small problem...

His wife had a premonition: the house would look so much better with stone accents! Robert was sure that it would be complicated and expensive to redo the chimney, column and gables in stonework. They decided to buy the house anyway and do the renovations themselves.

When they presented their project, the distributor had an innovative solution. Beonstone panels made installation of the new siding easy even in less accessible areas. And with screw-fastened sills, installation couldn't be easier!

Now Lynda and Robert are sure: their Bromont home is perfect!

When Mary visited a condo in the heart of downtown last fall, she was delighted. Modern and functional, it was just a stone's throw from restaurants, show venues and her workplace. She wouldn't even have to drive!

After Mary spent a few weeks browsing through interior design magazines, she decided to make some changes to her condo. *"My work schedule doesn't leave me a lot of free time. I'm not very good with my hands either, and I didn't want to bother my friends or brother. Since I'm on the 12th floor, bringing in the material is also a problem."*

"SINCE I MOVED IN, HOWEVER, I FIND THAT IT LACKS WARMTH AND ATMOSPHERE. THERE'S TOO MUCH BLAND WHITE EVERYWHERE FOR MY TASTE."

Chatting one day with her colleague Martin, he told her about a new product he had just used for the siding on his outdoor chimney. *"He promised me that Beonstone panels are designed for both indoor and outdoor applications."* With these reassurances, she jumped into the project.

"In just one day, everything was finished! No mortar, no glue, no mess. And the panels are easy to install! I'm so proud of myself and my new living room!"

PERFORMANCE

Durable and versatile, Beonstone products are designed for both interior and outdoor applications, thanks to their integrated drainage system. No particular structure is required: the siding you choose can be installed directly onto a standard framed wall and works with any type of building. Thinking of renovating or constructing? Beonstone is the perfect choice for any project.

EASY INSTALLATION

When it comes time to renovate, you will be amazed how easy it is to install Beonstone products. The siding panels are light and easy to handle. Simply set them in place and screw them on. It's that simple! In just a few hours, the architectural style of a room or even your whole house will have a fresh new look!

ELEGANCE

Give your home the distinctive beauty you have always dreamed of. All of our trendy European sidings perfectly reproduce the look of natural stone and are synonymous with elegance and comfort. Available in three popular colours, each of our three unique finishes blends perfectly with most current materials for a simply spectacular result!

FOR TOOLS, IDEAS, AND PROJECTS TO INSPIRE YOU...

beonstone.com/download

The appearance and cost of material plays a key role in choosing residential siding. The technical specifications, however, are critical to your investment over the long term.

A quality siding must be designed to protect the house. For this reason, it needs to provide adequate ventilation and prevent water infiltration. Resistance is also an important consideration: the siding shouldn't come loose, crack or deteriorate.

Among new products on the market, Beonstone panels meet all these criteria. With the integrated D.RAIN system expressly designed to prevent water infiltration, the panels are guaranteed for 50 years. Manufactured from concrete using a new technology, they are more impervious than other similar products made of thinner plastic material.

Get the information and compare the various products on the market before making a decision. An informed choice now will prevent unpleasant surprises down the road.

Philippe Samson, Engineer

Typical structure of a standard outside wall

D.RAIN PATENTED SYSTEM

The D.RAIN system built into the back of every panel automatically aligns, blocks and anchors the panel and provides for safe drainage in the event of water infiltration.

1 Mechanical anchoring system

- Panels attach firmly
- Maximum stability

2 Coloured concrete

- Will not discolour
- Colour remains intact even if the panel is damaged

3 Drainage

- Prevents excess humidity and mildew
- An air space allows the wall to ventilate

4 Self-aligning and self-blocking system

- Easy to install
- Structurally strong

MANUFACTURED IN CANADA

beonstone.com/testimonials

“THE IDEA HAD BEEN SIMMERING IN THE BACK OF OUR MINDS FOR A WHILE. EVERYWHERE WE WENT, SYLVIE WOULD POINT OUT RENOVATIONS MADE WITH STONE.

“We talked about what we liked. . . and what we didn’t. We also visited several renovation shows, where we discovered a product that was perfect for our situation.”

Once the decision was made, the project went ahead quickly. Sylvie and Alain wanted to do much of the work themselves. *“We both enjoy renovating, and working with Beonstone products was a snap. We installed them ourselves!”* Sylvie exclaims proudly. With all the information we had gathered, as well as the technical guides and demonstration videos, installing the stone panels was really easy. *“Just fit one panel into another, fasten with two screws and you’re done,”* declares Alain with a bright smile.

The couple are convinced that investing a modest amount to give their residence a makeover was definitely worthwhile. *“The look of stone has given our home new charm and added value to the property. It looks new,”* concludes Sylvie.

PARTICIPATE IN THE "WIN YOUR RENOVATIONS" CONTEST

Enter between April 1 and September 1, 2016
for your chance to win your complete renovation project
without spending a penny...or almost!

**BEONSTONE'S
RENOVATION
CONTEST**
WIN UP TO \$5,000

By entering the Beonstone Win Your Renovation contest, you grant Beonstone the right to use the photos of your renovations on our website, as well as in print material and online advertising, without any time limit. You also agree to allow Beonstone to take photos of your renovations. Finally, you agree to make a client testimonial video for promotional purposes, if Beonstone so requests.

All the contest details are available at

beonstone.com/contest

The winner, who will be announced on September 15, 2016, will receive the amount spent on Beonstone products for a renovation project up to a value of \$5,000.

1

Take a photo of your Beonstone renovation project **BEFORE THE WORK** begins.

2

AFTER THE WORK, take another photo of your renovation project. Be sure to mention whether you did the work yourself.

3

SEND US THE TWO PHOTOS by uploading them to the Contest section of our website or forwarding them by email to: concours@beonstone.com.

4

LIKE and **SHARE** the photos of your renovation on our Facebook page. Every "LIKE" that your renovation receives will give you an additional entry in the draw for the grand winner, so share your photos as much as possible!
