

PRIMA VINYL

STAGE  
WINDOWS & DOORS

# Hung

Hung windows are available with a single- or dual-operating sash. The sash slide along a vertical track to allow ventilation. They are an excellent choice for areas that face walkways, decks, or porches as they do not open outward.

Window Type	Size Tested	Air Perf- ce	Water Perf- ce	Product Class	Perf- ce Grade
Single	47.6" x 71.7"	A3	440Pa	Residential	PG40
Double	47.6" x 71.7"	A3	440Pa	Residential	PG40

## Single

A single-hung window consists of a stationary sash and an operable sash that moves up and down. The operable sash also tilts inward for easy cleaning.

## Double

Hung dual or double-hung vinyl windows have two operable sashes that slide vertically and tilt for easy cleaning. One or both sashes can be opened simultaneously for better ventilation.

## Arch Top

Hung arch top windows come in a variety of sizes, lite patterns, and radius shapes for design flexibility (including picture windows and transoms).
